

## Leading development of shared value in Australia

## The State of Shared Value in Australia

### Introduction

#### Purpose of this survey

There are an increasing number of companies creating shared value through different strategies across Australia but no central database that pulls together all of these examples or any way for organisations to learn from each other's experiences.

The main purpose of this survey therefore is to understand the current state of shared value activities across leading companies in Australia. The information collected will be used in three ways:

- To share examples of Shared Value strategies being implemented in organizations across the country
- · To demonstrate the potential impact and benefits of implementing a Shared Value strategies
- To inform the Shared Value Project of the support companies need to develop and implement a strategy which has a focus on social impact and help them determine the role they can play going forward

#### What is Shared Value?

Shared value is defined as policies and practices that enhance the competitiveness of companies while improving social and environmental conditions in the regions where they operate. It is a business strategy which allows companies to create measurable economic benefit by identifying and addressing social problems that intersect with their business.

Shared value is not about redistributing value that is already created (philanthropy) or about including stakeholders' values in corporate decisions (social responsibility) where there is limited connection to business operations. To qualify as a Shared Value strategy, there must be an identifiable economic benefit to the company as well as measurable impact on a social or environmental issue.

## About the authors

This survey is a collaborative effort between the Shared Value Project (SVP) and Social Ventures Australia. SVP is a regional community of practice committed to driving adoption and implementation of shared value strategies among leaders and companies, civil society, and government organisations in Australia. Social Ventures Australia is a not-for-profit that offers funding, investment and advice to partners to support their efforts to increase their impact on the lives of people in need.

The Shared Value Project is keen to understand how we can better support companies to expand the ways in which they create shared value.
Shared value.
You should use this section to share as much detail as possible about what sort of support you would like to see to drive shared
value creation in your industry.
1. What support would help you to advance more shared value efforts, and improve your
company's impact?
2. What societal challenges intersect your business?
Are there any that you believe could be addressed through a shared value approach?
